**PRESS RELEASE**

**FOR IMMEDIATE RELEASE:**

**SolCool One, LLC and Senergy Cooling Systems  
Deliver First DC Millennium HVAC to SolCool Australia**

January 21, 2008, *Kardinya, Perth, Western Australia* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the first Millennium direct current air conditioning/heating system to the SolCool PTY Ltd. Showroom in Kardinya, Perth, Western Australia.

“The Millennium will play a pivotal role in reducing energy consumption for climate control across the country”, commented Andy Cobb, President of SolCool PTY, Ltd., the national distributor for the Millennium in Australia. “The Millennium line of direct current climate control systems in the ½ to 5 ton range will no doubt contribute to far better efficiencies and higher levels of performance in most on and off grid environments” , Mr. Cobb went on to say.

The 1.5 ton, 18,000 BTU split version of the Millennium in Kardinya demonstrates how the built-in smart charger uses renewable, direct current and or alternate current, grid sources to charge on-board deep cell batteries that power its 24 or 48 volt internal system. The battery driven Millennium can cool or heat uninterrupted for hours or days without any charging from outside sources at approximately 2/3 less power consumption than comparable conventional hardware.

“There is nothing in the world like the Millennium”, claimed Clifford Sutton, V.P. Sales & Marketing for SolCool One, LLC. “The Millennium will smart charge from solar, wind, hydro or any other direct current choice and if there isn’t any DC source it will automatically charge from a grid or generator source. If charging is interrupted, the Millennium System will continue to cool, heat, light and charge DC accessories such as cell phones and laptops for hours or days – incredible!”

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, “Millennia” in concert with its manufacturing partner Senergy Cooling Systems. The Millennium System line will expand to ½ to 5 ton split and package choices in 2008.
